### EX PARTE QUAYLE

1. This application is in condition for allowance except for the following formal matters:

Substitute specification is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

### ***Allowable Subject Matter***

2. Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

- The primary reason for the allowance of claims 1-21 are is the inclusion of the limitation of an in-drop generator for an ink jet printer comprising a generator characterized in that the wall of each resonance cavity is perpendicular to the nozzle plate, the first contour line being formed by two equal segments that are parallel to one another and the axial direction of the nozzles, each segment having two ends: a first end and a second end, the two first ends of each segment being connected by a first curved line and the two second ends of each segment being connected by a second curved line This structure provides the advantage of obtaining a

progressive junction between the generator housing and the resonance cavity. It is limitation found in each claims, as it is claimed in the combination, that has not been found, taught, or suggested by the prior art of record which makes these claims allowable over the prior art.
